

AMENDMENTS TO THE DRAWINGS

FIGURES 5 and 6 have been amended to correct typographical errors in the labeling of items. The item originally identified as "322" in FIGURE 5 has been corrected to be properly identified as "332" and the item identified as "332" in FIGURE 6 has been corrected to be properly identified as "322." These corrections are typographical in nature and do not add any new matter. Additionally, these corrections are consistent with the description of these figures in the specification.

For example, page 15, lines 4-6, states that "the application programs resident within the computing environments supported by off-site server 332 and client workstation 322 are illustrated in FIGURE 5 and FIGURE 6, respectively." Additionally, the specification further states that "[t]he computing environment supported by off-site server 332 includes ImageCapture application 510, CameraControl application 520, CameraReturn application 530, and CameraTour application 540." Application, p. 15, lines 7-9. Still further, the specification states that "[r]eferring now to FIGURE 6, the computing environment supported by client workstation 322 includes View application 610, ViewControl application 620, and ArchiveViewer application 630." *Id.* at p. 17, lines 8-10. Accordingly, the proposed corrections to FIGURES 5 and 6 are supported by the specification.

Pursuant to 37 C.F.R. § 1.121(d) included with this response are marked-up copies of FIGURES 5 and 6 illustrating the changes in red. Also enclosed are clean copies of the corrected FIGURES 5 and 6.

Approval of the proposed drawing changes is respectfully requested.
